PROFESSIONAL SUMMARY:

Results-driven **Quality Engineer** with **3+ years of progressive experience** in quality assurance, process optimization, and manufacturing excellence across **EV battery manufacturing, automotive, and high-volume production environments**. Proven expertise in driving **zero-defect quality**, reducing non-conformances, leading **CAPA, FMEA, and SPC initiatives**, and implementing enterprise-level quality systems compliant with **ISO 9001, IATF 16949, and customer-specific quality standards**. Strong in **data-driven quality engineering**, leveraging **Minitab, SQL, Power BI, QMS platforms, and Lean / Six Sigma methodologies** to improve product reliability, supplier quality, and manufacturing performance in fast-paced USA

EDUCATION:

Master of Engineering and Management | University of Maryland, Baltimore County, Baltimore, MD **Feb 2023 - Dec 2024**
Bachelor of Mechanical Engineering | SRM University AP, Amaravati, India **2018 - 2022**

TECHNICAL SKILLS

Quality & Compliance: Quality Management Systems (QMS), CAPA & Nonconformance Management, FMEA / PFMEA, Statistical Process Control (SPC), Control Plans, Risk Assessment & Mitigation, Root Cause Analysis (8D), ISO 9001, IATF 16949, PPAP, APQP, Internal & Supplier Audits

Data & Statistical Analysis: Minitab, JMP, SQL, Python (Pandas for data analysis & automation), Advanced Microsoft Excel, Statistical Data Analysis, Trend & Pareto Analysis, Design of Experiments (DOE)

Process & Manufacturing Excellence: Lean Manufacturing, Six Sigma (Green Belt), Kaizen, Continuous Improvement, Process Optimization, Standard Work, 5S, Waste Reduction, Yield & Throughput Improvement

Tools: SAP ERP, SAP QM, MasterControl (QMS), Power BI, Tableau, Qlik Sense, Jira, Confluence, Trello

PROFESSIONAL WORK EXPERIENCE

Quality Engineer | LG Energy Solution, USA **Jan 2025 – Present**

- Led quality planning and execution of Corrective and Preventive Actions (CAPA), reducing internal and customer-reported defects by 30% within the first 6 months through structured root cause analysis and trend monitoring.
- Managed enterprise-level QMS improvements aligned with ISO 9001 and IATF 16949, supporting audit readiness and achieving zero critical findings during internal and external audits.
- Developed and deployed SPC dashboards and quality performance reports using Minitab, Power BI, and SQL, enabling real-time monitoring of critical battery manufacturing parameters.
- Conducted FMEA / risk assessments for new process introductions and engineering changes, reducing process risk exposure by 40%.
- Championed Lean / Six Sigma Green Belt projects focused on scrap reduction, yield improvement, and rework elimination, delivering \$120K+ annual cost savings.
- Partnered with supplier quality and manufacturing teams to drive incoming quality improvements, resulting in a 25% year-over-year reduction in supplier defects.

Tools Used: Minitab, SQL, Power BI, SAP QM, MasterControl, JMP, Advanced Excel, QMS Platforms

Process / Manufacturing Engineer | Hyundai Motor India Ltd, India **Aug 2020 – Dec 2022**

- Spearheaded process improvement and optimization projects on the production line, driving 12% increase in throughput while maintaining strict quality objectives.
- Led data-driven quality monitoring and defect reduction initiatives using SPC, DOE, and Root Cause Analysis.
- Implemented Lean Manufacturing principles including 5S, Kaizen, and Standard Work, resulting in reduced lead time and waste.
- Collaborated closely with cross-functional teams (Manufacturing, Quality, Supply Chain) to drive process stability and robust internal controls.
- Facilitated manufacturing automation and process digitization pilots using basic Python scripting & Excel macros to accelerate reporting and trend analysis.
- Managed process audits and compliance to IATF 16949 and internal standards.

Tools Used: SPC Tools, Excel, Python, Lean / Six Sigma methodologies, SAP ERP, JMP, Kaizen Toolkits, DOE analysis
