

LATHA MATTHE

Data Analyst | Business Systems Analyst | Technical Analyst

Dallas, TX | 123 - 456 -7890 | lathammatthe@gmail.com | Open to Relocation

PROFESSIONAL SUMMARY

Results-driven Data and Business Systems Analyst with 5+ years of progressive experience across start-up, midmarket, and enterprise environments in India and the United States. Skilled in translating complex business requirements into data-driven solutions, building interactive dashboards, automating reporting workflows, and supporting end-to-end system implementations. Proficient in SQL, Python, Power BI, and Tableau with strong command of Agile methodologies, UAT, stakeholder management, and CRM/workflow integrations. Proven track record of improving operational efficiency, defining KPIs, enabling data-informed decision-making, and conducting GAP analysis to bridge business needs with technical solutions across cross-functional teams.

CORE COMPETENCIES

Data Analysis | Business Requirements Gathering | SQL & Python | Power BI & Tableau | GAP Analysis | As-Is / To-Be Process Mapping | CRM Administration (Salesforce, HubSpot) | UAT & QA | KPI Definition & Tracking | System Integration | Data Validation & Governance | Agile / Scrum | Stakeholder Management | Workflow Optimization | Change Management | SWOT Analysis | Cost-Benefit Analysis | BRD / FRD Documentation | Use Case & User Story Authoring

TECHNICAL SKILLS

Programming & Query Languages: SQL, Python (Pandas, NumPy, Scikit-learn)

Data Visualization & BI: Power BI (DAX, data modeling), Tableau, Advanced Excel

Databases: Microsoft SQL Server, MySQL, PostgreSQL, Azure SQL

Cloud Platforms: AWS (S3, Lambda, ECS), Azure (Azure ML, Blob Storage)

Systems & Integration: REST APIs, JSON, XML, data flows, system interaction design

CRM & BA Tools: Salesforce, HubSpot, Jira, Azure DevOps, Confluence, Visio, Lucidchart, Git

BA Frameworks: GAP Analysis, SWOT Analysis, MoSCoW Prioritization, Root Cause Analysis, Cost-Benefit Analysis, BRD/FRD Authoring

Methodologies: Agile (Scrum, Kanban), Waterfall, SDLC, CI/CD Pipelines

PROFESSIONAL EXPERIENCE

Business Analyst | Fidelity Investments | Dallas, TX *Feb 2024 – Present*

- Partnered with executive stakeholders to gather, prioritize, and document functional and non-functional requirements for data platform modernization initiatives.
- Conducted GAP analysis to identify discrepancies between current-state processes and future-state capabilities, producing actionable roadmaps for cross-functional teams.
- Designed and maintained Power BI dashboards tracking 20+ KPIs across investment operations, improving executive visibility into portfolio performance.
- Authored comprehensive BRDs and FRDs, translating stakeholder needs into detailed use cases, user stories, and acceptance criteria.
- Performed end-to-end SQL-based data validation, data cleansing, and quality checks across enterprise reporting systems to ensure accuracy and integrity.
- Led Agile ceremonies including sprint planning, retrospectives, and backlog grooming; managed user stories in Jira for cross-functional delivery teams of 12+.
- Coordinated UAT cycles including test case design, defect tracking, and release validation; achieved zero critical defects across 4 consecutive production releases.
- Analyzed and mapped data flows across integrated systems, maintaining data documentation, reporting logic, and metadata definitions to support governance standards.

Business Systems Analyst | JPMorgan Chase & Co. | New York, NY *Dec 2023 – Jan 2024*

- Gathered and translated business requirements into detailed functional specifications and data flow diagrams for regulatory reporting and CRM integration projects.
- Performed GAP analysis between legacy reporting systems and new regulatory requirements, identifying 15+ process gaps and recommending remediation strategies.

- Managed CRM configuration and workflow customization to streamline client lifecycle tracking and improve data capture accuracy across operations teams.
- Built automated reporting pipelines and ad-hoc dashboards in Tableau and SQL Server, reducing manual reporting effort by 30% across the operations team.
- Validated REST API responses and supported system-to-system integration testing to ensure accurate, real-time data exchange between core banking platforms.
- Conducted root cause analysis and process mapping to identify workflow bottlenecks, implementing optimizations that reduced processing time by 20%.
- Partnered with engineering, compliance, and product teams through the full SDLC to deliver 3 major regulatory compliance enhancements on schedule.
- Owned end-to-end UAT including test plan authoring, defect tracking in Jira, and sign-off documentation for stakeholder acceptance.

Junior Data / Business Analyst | Qualcomm | Hyderabad, India Jun 2020 – Jun 2022

- Analyzed operational and performance data using SQL and Excel to identify process inefficiencies and root causes of reporting delays.
- Conducted business process mapping and GAP analysis, documenting current-state and future-state processes for 10+ internal departments to support strategic planning.
- Supported CRM implementation and user adoption, assisting in data migration, workflow configuration, and end-user training.
- Developed KPI dashboards and ad-hoc reports in Excel and Power BI, improving management reporting turnaround by 30%.
- Performed SWOT and cost-benefit analyses to support business case development for process improvement initiatives.
- Ensured data quality and integrity through systematic data validation, cleansing, and consistency checks across multiple reporting systems.
- Created and maintained process documentation including flowcharts, SOPs, and templates, supporting standardization and knowledge sharing.
- Supported system implementation and UAT activities including data preparation, test execution, and end-user training for ERP and CRM rollouts.

ACADEMIC PROJECTS

Customer Churn Prediction (Python, Tableau, SQL): Built a Decision Tree model identifying key churn drivers; achieved a 15% simulated reduction in churn rate. Applied SMOTE to balance dataset from 41K to 73K records.

E-Commerce Packaging Optimization (Power BI): Visualized packaging cost, delivery time, and sustainability KPIs across thousands of orders; integrated SQL-derived metrics for actionable dashboards.

Bank Marketing Analytics (Python, ML): Predicted term deposit likelihood post-marketing using Logistic Regression and Decision Trees; achieved F1-score of 0.76 and AUC of 0.85.

EDUCATION

MBA, Business Analytics | Utica University, Utica, NY | 2024

Bachelor of Business Administration | Vishwa Vishwani Business School, Hyderabad, India | 2021

Authorized to work in the United States with valid work authorization.
